

ON LOAD TAP CHANGERS

*On Load Tap Changer Type S
Type SN/500 L1/750/400/12G*

ELIN OLTC On load Tap changers

IEC 214 & 542
CENELEC HD. 367 S2
DIN/ VDE 0532 Teil 30 und 31

Types: J S T Q

In tank type

3 main assembly parts: upper part of switch
diverter switch
selector switch*)

Assembly:

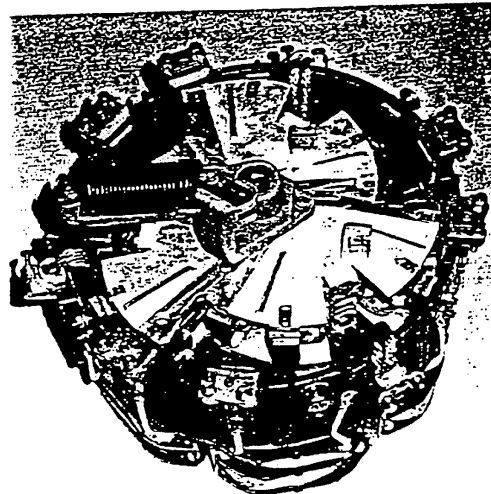

Column designs: space saving assembly
Modular system: combinations according
to technical requirements

*) optional with or without change-over selector

Application

ELIN OLTC On load Tap changers are used for changing the transforming ratio of oil immersed transformers without interruption of the load. The uninterrupted change-over is carried out via ohmic resistors according to the Dr. Jansen principle.

To be able to meet almost *all requirements of transformer producers* we offer a *wide range of an On load Tap changers in many varieties.*
