SITOP Modular/1AC/DC24V/20A

SITOP modular 20 A stabilized power supply input: 120/230 V AC output: 24 V DC/20 A

input		
type of the power supply network	1-phase AC	
supply voltage at AC	Set by means of wire jumper on the device; starting from Vin > 93/183 V	
supply voltage	120 V/230 V	
input voltage 1 at AC	85 132 V	
input voltage 2 at AC	176 264 V	
wide range input	No	
overvoltage overload capability	2.3 × Vin rated, 1.3 ms	
buffering time for rated value of the output current in the event of power failure minimum	20 ms	
operating condition of the mains buffering	at Vin = 230 V	
line frequency	50/60 Hz	
line frequency	47 63 Hz	
input current		
 at rated input voltage 120 V 	7.7 A	
at rated input voltage 230 V	3.5 A	
current limitation of inrush current at 25 °C maximum	60 A	
I2t value maximum	9.9 A ² ·s	
fuse protection type	Yes	
fuse protection type in the feeder	Recommended miniature circuit breaker at 1-phase operation: 10 A characteristic C; required at 2-phase operation: circuit breaker 2-pole connected or circuit breaker 3RV2411-1JA10 (120 V) or 3RV2411-1FA10 (230 V)	
output		
voltage curve at output	Controlled, isolated DC voltage	
output voltage at DC rated value	24 V	
output voltage		
at output 1 at DC rated value	24 V	
output voltage adjustable	Yes; via potentiometer	
adjustable output voltage	24 28.8 V	
relative overall tolerance of the voltage	3 %	
relative control precision of the output voltage		
on slow fluctuation of input voltage	0.1 %	
on slow fluctuation of ohm loading	0.1 %	
residual ripple		
• maximum	100 mV	
• typical	30 mV	
voltage peak		
• maximum	200 mV	
• typical	60 mV	

diaplay vorsion for normal anaration	Croon LED for 24 V OV	
display version for normal operation	Green LED for 24 V OK	
type of signal at output	via signaling module (6EP1961-3BA10)	
behavior of the output voltage when switching on	Overshoot of Vout approx. 3 %	
response delay maximum	0.1 s	
voltage increase time of the output voltage		
• typical	50 ms	
output current		
rated value	20 A	
rated range	0 20 A; +60 +70 °C: Derating 3.5%/K	
supplied active power typical	480 W	
short-term overload current		
at short-circuit during operation typical	60 A	
duration of overloading capability for excess current		
at short-circuit during operation	25 ms	
constant overload current		
on short-circuiting during the start-up typical	23 A	
bridging of equipment	Yes; switchable characteristic	
number of parallel-switched equipment resources for increasing	2	
the power	2	
efficiency		
efficiency in percent	89 %	
power loss [W]		
at rated output voltage for rated value of the output	59 W	
current typical		
closed-loop control		
relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical	1 %	
relative control precision of the output voltage load step of resistive load 50/100/50 % typical	2 %	
setting time		
• load step 50 to 100% typical	2 ms	
• load step 100 to 50% typical	2 ms	
setting time		
maximum	5 ms	
protection and monitoring		
Protestion and morning	< 35 V	
design of the overvoltage protection		
design of the overvoltage protection		
property of the output short-circuit proof	Yes	
property of the output short-circuit proof design of short-circuit protection	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown	
property of the output short-circuit proof design of short-circuit protection • typical	Yes	
property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A	
property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A	
property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A	
property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown"	
property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety galvanic isolation between input and output	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown"	
property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178	
property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown"	
property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I	
property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA	
property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA	
property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA	
property of the output short-circuit proof design of short-circuit protection	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA	
property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum • typical protection class IP	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA	
property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum • typical protection class IP standard	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA IP20	
property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum • typical protection class IP standard • for emitted interference	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA IP20 EN 55022 Class B	
property of the output short-circuit proof design of short-circuit protection	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA IP20 EN 55022 Class B EN 61000-3-2	
property of the output short-circuit proof design of short-circuit protection	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA IP20 EN 55022 Class B EN 61000-3-2	
property of the output short-circuit proof design of short-circuit protection	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA IP20 EN 55022 Class B EN 61000-3-2	
property of the output short-circuit proof design of short-circuit protection	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA IP20 EN 55022 Class B EN 61000-3-2 EN 61000-6-2	
property of the output short-circuit proof design of short-circuit protection	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA IP20 EN 55022 Class B EN 61000-3-2 EN 61000-6-2	
property of the output short-circuit proof design of short-circuit protection	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA IP20 EN 55022 Class B EN 61000-3-2 EN 61000-6-2 Yes Yes; cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259	
property of the output short-circuit proof design of short-circuit protection	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA IP20 EN 55022 Class B EN 61000-3-2 EN 61000-6-2 Yes Yes; cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259 Yes; cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259

security information

security information

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
