

GP AND HP SERIES

ISOLATOR

DGP-□

DGP-□L : With limiter

Plug-in type makes upkeep and changes in configuration simple.

Improved reliability and greater compactness through the use of custom ICs.
Photocouple provides complete insulation between input and output.

SPECIFICATION

INPUT	OUTPUT	AUXILIARY POWER SUPPLY
8 standard type of input are available	8 standard type of output are available	AC 100/110V ±10% 50/60Hz approx. 2.5 VA AC 200/220V ±10% 50/60Hz approx. 2.5 VA DC 24V ±10% approx. 2.5 W DC 100/110V ±10% approx. 2.5 W types are immediately available. For types not listed above contact a company representative.
Available with voltage input range DC 0.1mA~100mA current input range DC 10mV~300V	Available with Max.voltage output 10V (600 Ω~∞) Max.current output 20mA (0 ~550Ω)	

SPECIFIC CHARACTER

(1) Tolerance

±0.25% of output span. (Ambient temperature 23 °C)
In case of input or output range at below 50mV :
±0.5% of output span.

(2) Effect of temperature

Within ±0.25% of output span. (For 23°C±10°C variations)
In case of input or output range at below 50mV:
±0.5% of output span.

(3) Effect of auxiliary power supply

Within ±0.1% of output span. (For rated voltage ±10% variations)

(4) Effect of load resistance

Within ±0.05% of output span. (For load resistance range)

(5) Output ripple

Within 0.5%p-p of output span.

(6) Response time

Shorter than 0.5sec. (Time to 99% output)

(7) Dielectric strength

2000V AC,1min. (50/60Hz)
(Between input,output,auxiliary power supply and external case)

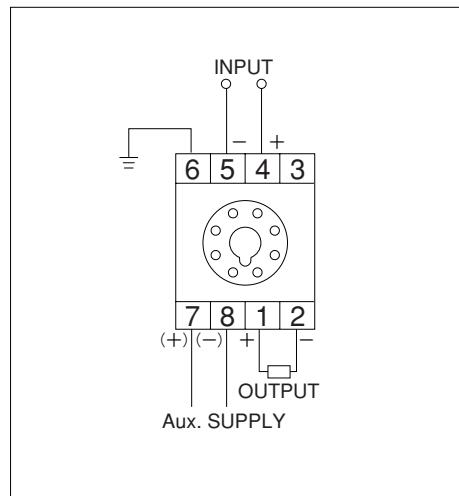

(8) Insulation resistance

Higher than 100MΩ at 500V megger.
(Between input,output,auxiliary power supply and external case)

(9) Weight

Approx.410g

GP AND HP SERIES

TEMPERATURE TRANSDUCER

CGP-□ : As a temperature sensor the resistance temperature detector is a temperature-DC conversion device.

Generous input specifications. •From -200°C to $+500^{\circ}\text{C}$.

Photocouple provides complete insulation between input and output-the influence of common mode noise is excluded and stable operation is ensured (AC 2000V,1 min.).

Linearizer is standard. •Linearity below $\pm 0.2\%$.

Influence of connecting cable is excluded. -Resistance temperature detector drives a constant, the type of measurement errors that are caused by the use of a connecting cable do not happen.

Equipped with burnout function. •Sensor circuit failure immediately detected and output.

Plug-in type makes upkeep and changes in configuration simple.

SPECIFICATION

INPUT	OUTPUT	AUXILIARY POWER SUPPLY
Platinum resistance temperature detector, 3-lead type : Pt100Ω, JPt100Ω. Standard six bands of measured temperature range. Regulated sensor current : DC 2mA	8 standard type of output are available. Burnout : Upper	AC 100/110V $\pm 10\%$ 50/60Hz approx. 3 VA AC 200/220V $\pm 10\%$ 50/60Hz approx. 3 VA DC 24V $\pm 10\%$ approx. 3 W DC 100/110V $\pm 10\%$ approx. 3.5 W types are immediately available. For types not listed above contact a company representative.
Available resistance temperature detectors Platinum(Pt,JPt)100Ω(0°C) -input span of over 50 °C When resistance temperature detectors not conforming to JISC 1604-1989 are specified please indicate the resistans line curve.	Available with Max.voltage output 10V (600Ω~∞) Max.current output 20mA (0~550Ω) The burnout value may be lowered according to your needs.	

SPECIFIC CHARACTER

(1) Available resistance temperature detectors

Platinum(Pt,JPt)100Ω -input span of over 50°C

Platinum(Pt)50Ω -input span of over 100°C

at JIS C 1604-1989(resistance temperature detector)

As well as nickel,platinum-cobalt, and copper resistance temperature detectors that conform to JIS C 1604-1989 are also available;

please contact a company representative and explain your need.

Input system 3-lead type (permissible line resistance,200Ω per lead)

(2) Regulated sensor current

DC 2mA

(3) Tolerance

$\pm 0.5\%$ of output span.(Ambient temperature 23°C)

(4) Effect of temperature

Within $\pm 0.2\%$ of output span. (For $23^{\circ}\text{C} \pm 10^{\circ}\text{C}$ variations)

(5) Effect of auxiliary power supply

Within $\pm 0.1\%$ of output span. (For rated voltage $\pm 10\%$ variations)

(6) Effect of load resistance

Within $\pm 0.05\%$ of output span. (For load resistance range)

(7) Output ripple

Within 0.5% p-p of output span.

(8) Response time

Shorter than 0.5sec. (Time to 99% output)

(9) Dielectric strength

2000V AC,1min.(50/60Hz) (Between input,output,auxiliary power supply and external case)

(10) Insulation resistance

Higher than 100MΩ at 500V megger. (Between input,output,auxiliary power supply and external case)

(11) Built-in Functions

Isolation (photo-couple method)-standard

Linearizer (linearity within $\pm 0.2\%$)-standard

Burnout function-In the standard specification burnout is set for when the following upper limit is exceeded:when the output value = max.output value + 10~15% of the output span(e.g., 21.6~22.4mA when the output is 4~20mA).

The burnout value may be lowered according to your needs.

(12) Weight

Approx.410g
